

Register as an organ, eye and tissue donor

First Name

Middle Name

Last Name

Gender: Male Female

Date of Birth

Address

MD

City

State

Zip Code

License/ID Number (optional)

Telephone (optional)

Email (optional)

Your email address will be used only to send you a confirmation of your registration. By completing this registration as an organ, eye and tissue donor, I affirm that I am the individual described on this application and that the information entered herein is true and correct to the best of my knowledge. All information submitted will be kept completely confidential and will only be accessed by Donate Life Maryland professionals. Your information will not be shared, sold or otherwise compromised. This registration will serve as a document of gift as outlined in the Maryland Uniform Anatomical Gift Act. A documentation of gift, not revoked by the registrant before death, is irreversible and does not require the consent of any other person. It also authorizes any examination necessary to ensure the medical acceptability of the anatomical gift. I give my permission for my information, changes or deletions to be entered into the Maryland Donor Registry.

Frequently Asked Questions

What does it mean to register as a organ, eye and tissue donor at the MVA?

You are joining the official Maryland Donor Registry. This allows Maryland residents to register their authorization to donate all or specific organs, eyes and tissues, upon their death. As of October 1, 2015, Marylanders also have the choice to display the heart symbol noting your donor registration on your license.

Can my family override my decision to donate?

Your donor registration grants authorization for organ, eye and tissue recovery. Should donation be possible, your next of kin will be presented with documentation of your registration but will not be able to override your decision.

Who can register as an organ, eye and tissue donor?

Everyone is considered a potential donor regardless of age or pre-existing medical condition. Each potential organ, eye and tissue donor is evaluated on an individual basis for suitability.

Can I specify organs/tissues that can be donated?

If you sign up at the MVA, your drivers license/ID number acts as your Registration ID number. At any time, you may visit www.DonateLifeMaryland.org, select Update Your Donation Wishes, enter your login information and specify donation limitations.

At what age can someone register as a donor?

The official Maryland Donor Registry allows Maryland residents who are at least 18 years of age to register their authorization to donate all or specific organs, eyes and tissues upon their death. Minors between the ages of 13 and 17 can join the Maryland Donor Registry, but until the person is 18 years old, parents or a legal guardian will make the final decision about organ, eye and tissue donation at the appropriate time.

Does my registration grant consent for whole body donation?

Donate Life Maryland facilitates deceased organ, eye and tissue donation - this is different from whole body donation. While it is possible to be both an organ, eye and tissue donor and whole body donor, there are separate organizations that exist to support whole body donor programs.

You have the power to Donate Life.

As a donor, you can save and enhance the lives of more than 50 people. Donated organs, eyes and tissue may include the following:

<i>Heart</i>	<i>Bones</i>
<i>Intestines</i>	<i>Corneas</i>
<i>Kidneys</i>	<i>Heart Valves</i>
<i>Liver</i>	<i>Skin</i>
<i>Lungs</i>	<i>Tendons</i>
<i>Pancreas</i>	<i>Veins</i>

Get the Facts

Organ, eye and tissue donation is an important decision and it helps to know the facts.

FACT: If you are sick or injured, the primary duty of emergency responders and hospital staff is to save your life. Your donor registration NEVER interferes with your medical care.

FACT: The medical team involved in the donation process is completely separate from hospital staff working to save someone's life in the emergency room.

FACT: Organ, eye and tissue donation is only discussed with the family after a patient has been declared dead.

FACT: Anyone can register as an organ, eye and tissue donor regardless of age or medical history.

FACT: Organ, eye and tissue donation is consistent with the beliefs of most major religions.

FACT: A national computer system and strict standards are in place to ensure ethical and fair distribution of organs. Organs are matched by blood and tissue typing, organ size, medical urgency, waiting time and geographic location.

FACT: An open casket funeral is possible for organ, eye and tissue donors. Through the entire donation process, the body is treated with care, dignity and respect.

FACT: There is no cost to the donor's family or estate for donation. The donor family only pays for medical expenses before death and costs associated with funeral arrangements.

It's about living. It's about life.

Organ, eye and tissue transplants offer patients a new chance at healthy, productive and normal lives and return them to their families, friends and communities. Transplantation is one of the most remarkable success stories in the history of medicine. It provides hope to thousands of people with organ failure. In addition, transplanted tissue offers hundred of thousands of people active and renewed lives. But transplantation requires the commitment of organ, eye and tissue donors. Unfortunately, the need for donors is much greater than the number of people who actually donate.

The Organ, Eye and Tissue Donation Awareness Fund

When you renew or apply for a new Maryland driver's license or state identification card, you have the opportunity to contribute in dollar increments to the Organ, Eye and Tissue Donation Awareness Fund. These charitable contributions are used to help promote public education and awareness regarding the importance of organ, eye and tissue donation. The Fund also helps maintain the official Maryland Donor Registry. Want to do more? We welcome financial and social support via our website at www.DonateLifeMaryland.org.
