
A Symbol That **Speaks**

The butterfly symbol is now available for your product!

A butterfly symbol quickly provides information about your hidden (intellectual and/or developmental) disability to law enforcement and others during an interaction.

Add the symbol for free online, at a kiosk, or during an appointment.

You do not need to provide any documentation about your disability to the MVA in order to add it to your license. The MVA will not ask you to explain your disability and your diagnosis will not be used for any MVA imposed restriction.
